

THE RETENTION SYSTEM IN THIS HELMET UTILIZES NEW TECHNOLOGY TO IMPROVE THE HELMET'S FIT, COMFORT AND STABILITY. THIS HEAD-LOC SYSTEM MAKES IT EASY TO ADJUST THE SHAPE AND INNER SIZE OF THE HELMET WHILE WEARING IT. SIMPLY PULL DOWN ON THE TWO SIDE TABS TO COMFORTABLY SECURE THE HELMET.

HOW IT WORKS

1. The first time the helmet is worn, adjust the buckle on the chin strap for a snug fit.

2. With the chin strap buckled, pull down on left and right Head-Loc tabs simultaneously until pressure is felt on the back of the neck.

3. Unsnap the chin strap buckle to remove the helmet. The Head-Loc system will automatically retain its adjustment until the next time the helmet is worn.
